

TRADE-IN POLICY

Considering the changes in science and computers, it is possible to trade-in from an older device to a newer device. Here is a guideline to follow if you wish to trade-in your device.

1. Contact your local Sales Representatives and inform them of your interest. They can tell you more about their policies and assistance in the trade-in procedure.
2. Your older device must be returned (we accept a trackable shipping number as confirmation) to the Budapest Home Office **after** we will release a new device to you.
3. Check the current trade-in prices with your local Sales Representative.
4. After the funds have been received, we are able to send your trade-in to you.
5. A Trade-in must be completed online by Sales Representatives. Please contact your Sales Representative to begin this process.

If you have further questions, please contact your Sales Representative.

Please note:

Until your old device is not received by our office, your account will be set to credit activation for 100 startups. In case the 100 startups were used, the software will be blocked until the old device is returned to our office.
